ABOUT ME

Motivated and results-driven Full Stack Developer with around 1 year of professional experience in software and web application development. Currently working at TretaGen, where I contribute to developing and maintaining scalable web applications using .NET technologies, React.js, PostgreSQL, and Tailwind CSS.

I have completed my Master of Computer Applications (MCA) from Indus University with a CGPA of 8.45. I possess strong knowledge of software development, database management, frontend and backend development, and modern web technologies.

Passionate about solving complex problems through technology and building efficient, user-friendly software solutions. I am eager to continuously learn new technologies and contribute effectively within a dynamic organization.

PROJECTS

- **Job Portal**

Developed a Job Portal platform during my internship at Novanectar Services that enables seamless interaction between job seekers and recruiters through dynamic job listings, advanced search functionality, and intuitive application management features.

- **School management system**

Designed and developed a comprehensive School Management System with multiple user portals to streamline school operations, student attendance, and teacher attendance management. The system includes dedicated Admin, Teacher, and Parent portals with role-based access control for efficient management and communication.

- **Healthcare Project – Pharmacy Management System**

Designed and developed a Pharmacy Management System with multiple user portals to streamline pharmacy operations and clinical management processes. The system includes dedicated Admin and Clinical portals with role-based access for efficient management and secure workflow handling.
